Trusted Milk – Color Palette & UI Styling Specification

Executive Summary: We propose a **teal-led palette** anchored by the primary teal (#1F6F8B) from the banner, balanced by **fresh green** (#27AE60) and **golden butter** accents (#F6D365). This scheme draws inspiration from modern food-tech apps while ensuring high accessibility. For example, Swiggy uses bold orange/purple【1†L28-L31】, Blinkit uses yellow/green【24†L28-L36】【44†L43-L50】, and Goibibo uses orange/blue【38†L42-L50】. By contrast, our teal/gold scheme fits a dairy theme (evoking freshness) while following Material Design contrast rules【30†L115-L122】【35†L238-L242】. We include detailed hex values, light/dark variants, and usage guidelines for every UI element (headers, buttons, cards, etc.) on each page (Signup through Help). **Accessibility:** All text colors meet WCAG 2.1 contrast (≥4.5:1 for body text 【35†L238-L242】) against their backgrounds. Below are our color tokens, page-by-page assignments, and implementation plan.

Brand & Reference Palettes

- **Primary Teal (#1F6F8B):** The core brand color. Dark teal provides freshness and trust (similar calm vibes in "Blue Ocean" palettes【50†L12-L19】). Light/dark variants should maintain ≥4.5:1 contrast with text【30†L115-L122】【35†L238-L242】.
- **Fresh Green (#27AE60):** A complementary success/accent color (used for confirm actions and status “Delivered”). Similar to Blinkit’s green【44†L55-L60】.
- **Golden Butter (#F6D365):** A warm accent for highlights (buttons, badges, warning states). Like the champagne gold in teal/gold UI schemes【60†L397-L401】.
- **Background Whites:** Use off-white/milk-white (#FCFCFA or #FFF7E6) for primary backgrounds. These remain light for readability. Dark-mode alternative is near-black (#121212).
- **Text Colors:** Primary text #202124 (dark charcoal) on white (~15:1 contrast). Secondary text #757575 (gray) and disabled text #BDBDBD on white (4.5:1 and 2.5:1 respectively – disabled is low contrast by purpose). In dark mode, invert to white/light-gray text on dark BG.
- **Neutral Card Background:** #FFFFFF (white) for cards and sheets; dark mode use #1E1E1E or similar dark gray.
- **Borders/Dividers:** #E0E0E0 (light gray) on white, and #303030 on dark.
- **Success/Error/Warning:** Green (#27AE60) for success (20% opacity for surfaces). Red (#EB5757) for error. Amber (#F2994A) or gold (#F6D365) for warnings. Ensure all state icons/text have appropriate contrast.
- **Disabled UI:** Use #BDBDBD or 30% opacity of primary for disabled buttons.
- **Shadows/Elevation:** Use subtle black overlays (e.g. RGBA(0,0,0,0.14) light mode, white on dark) as per Material guidelines.

【51†embed_image】 The **“Blue Ocean”** palette (above) shows #1F6F8B (third swatch) as a vibrant teal with lighter blues. Teal is suggested for headers/buttons, with ample white space【50†L12-L19】.

【61†embed_image】 The **“Champagne Teal UI”** palette (above) combines #0F766E (teal) with #F6D365 (champagne gold) and #FFF7E6. As noted in design references, teal drives navigation/state colors while gold highlights badges or CTA【60†L397-L401】. Our chosen #1F6F8B and #F6D365 follow this successful modern theme【59†L66-L70】【60†L397-L401】.

Design Tokens (Light & Dark)

Token	Light Mode	Dark Mode	Usage
Primary	#1F6F8B	#6F98A8	Header bg, primary buttons, icons
PrimaryVariant	#164F5E	#4E6E7E	Primary pressed state
Secondary	#27AE60	#3C8D46	Success buttons, badges, active states
Accent/Gold	#F6D365	#D1B352	Highlights, badges, warning accents
Background	#FCFCFA (milk)	#121212	App background
CardBg	#FFFFFF	#1E1E1E	Card/container backgrounds
TextPrimary	#202124	#E0E0E0	Main text, icons, labels
TextSecondary	#757575	#B3B3B3	Secondary/placeholder text
TextDisabled	#BDBDBD	#666666	Disabled text
Border	#E0E0E0	#303030	Input/card borders, dividers
Error	#EB5757	#FF8A80	Error text, icons
Warning	#F2994A	#FFCB6B	Warning text, icons (e.g. ETA pending)
Success	#27AE60	#66BB6A	Success text/icons (e.g. Delivered)
DisabledBg	#F5F5F5	#2C2C2C	Disabled elements background
Shadow	rgba(0,0,0,0.14)	rgba(0,0,0,0.50)	Default elevation shadow

- *Typography:* Use dark text (#202124) on light bg for >15:1 contrast. Secondary text (#757575) yields ~4.6:1 on white. Inverse in dark mode (white text on #121212 meets contrast【35†L238-L242】).
- *Buttons:* Primary buttons use Primary & Secondary tokens; text is white. Secondary buttons are outline style (border=Primary, bg=white). Disabled uses Disabled tokens (e.g. text #BDBDBD).
- *Icons:* Default icon color = TextPrimary (#202124) or Secondary (#757575). Action icons (onPrimary) use white on teal, etc.
- *Elevation:* Use soft drops (#00000022) beneath cards on light mode, soft white shadows on dark.

Color Accessibility

All choices adhere to WCAG 2.1 contrast guidelines. Regular text uses ≥4.5:1 contrast【35†L238-L242】 (e.g. #202124 on #FFFFFF is ~15:1). Large text (≥18pt) can be ≥3:1. Buttons and UI elements meet 3:1. We

avoid relying on color alone for status (icons/text accompany status colors). See W3C: “Colors must have sufficient contrast... text on images, icons, and buttons”【30†L115-L123】.

- **Contrast Ratios:** #202124 on #FFFFFF (~15.3:1), #757575 on #FFFFFF (~4.6:1) – meets AA for body text【30†L115-L123】. In dark mode, #E0E0E0 on #121212 (~12:1) etc.
- **Color-Blind Friendly:** We avoid red/green coding alone; status labels include icons/text. For example, “Delivered” uses green but also a check icon, “Error” uses red plus icon.
- **Disabled/Read-Only:** Use lowered opacity (#BDBDBD on #FFFFFF ~1.8:1) only for disabled states where legibility is less critical【35†L238-L242】.
